Aim: How can we use the python turtle library?

Dylan Says

Copy the following code into a python file in Thonny and run it (do not put this in the Thonny shell)

```
import turtle

raphael = turtle.Turtle()

raphael.fd(100)
raphael.rt(45)
raphael.fd(50)

window = turtle.Screen()
window.exitonclick()
```
