

Aim: How can we make recursive drawings?

depth = 1

So how can we go from one depth level to the one below?

1. Draw a curve 1 depth level less
2. Turn left 60 degrees
3. Draw a curve 1 depth level less
4. Turn right 120 degrees
5. Draw a curve 1 depth level less
6. Turn left 60 degrees
7. Draw a curve 1 depth level less

Can you turn this into a python function? (answer on next slide)
